DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. **Claims 1-7 and 9** are rejected under 35 U.S.C. 103(a) as unpatentable over Griffin (US6144870) in view of Houser (US5855552). Davies et al. ("The Rate Dependence of Confor Polyurethane Foams") is used as extrinsic evidence.
3. The rejection is maintained. See the Office Action mailed on 1/22/2009. Regarding the newly added limitations, the heating device of Houser inherently heats the shaft internally, not only externally. See the *Response to Arguments* below.

Response to Arguments

4. Applicant's arguments filed 4/22/2009 have been fully considered but they are not persuasive.
5. Applicant argues the heating device of Houser cannot heat the shaft of the tip section during wrapping, since it would prevent access to the shaft during heating.
6. The Examiner respectfully disagrees. Claim 1 does not require heating during wrapping. Rather, as currently presented, claim 1 requires the shaft of the tip section to be heated sufficiently to soften the material of the tip section shaft. The phrase "is heated" does not necessarily imply a step of heating, but, rather, it can be interpreted to mean it is sufficiently hot, i.e. it has been heated to a sufficiently high temperature. The actual heating can take place prior to the wrapping step, as long as the material is heated sufficiently to soften it.

Art Unit: 3729

7. Applicant further argues that the heating device of Houser does not internally heat the shaft.

8. The Examiner respectfully disagrees. While the device of Houser surrounds the shaft, the heat is transmitted toward the interior of the shaft, and it can therefore be said it internally heats it, since the heat will be transmitted through the material. The current claim language is not specific as to the location of the heater.

Conclusion

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
